# Andrei Anton

IT enthusiast with 2 years of experience in the software development processes

anton.andreii16@gmail.com   +40748619422

WORK EXPERIENCE

Fullstack developer
Waydev

02/2020 – Present

Achievements/Tasks

- Using Laravel, MySQL and React, I am developing several functionalities of an app that evaluates employees' performance based on selected technical KPIs.

Junior Software Developer
Neo Vision Technologies

03/2018 – 02/2020

Achievements/Tasks

- Front-end experience achieved by developing apps such as: www.confidas.ro, which helps analyze companies' activity; resyn.io, which enables local communities of farmers to manage their farms with ease; mingo.academy, implementing a design from Figma using the Vue.Js framework;
- Back-end experience working on the mentioned projects using Laravel, I also designed and built some of the databases using MySQL.

EDUCATION

Database Administration - Master's degree
University Politehnica of Bucharest

10/2019 – Present

Courses

- I am studying advanced notions in database administration and database systems as well as informatics system security.

Automatic Control and Computers - Bachelor's degree
University Politehnica of Bucharest

10/2015 – 06/2019

Courses/Thesis

- My thesis, "Decentralized modelling of traffic in urban areas", revolved around building a model in Simulink/Matlab that analyzes Bucharest traffic data as well as offering an insight on how to optimize the traffic by modifying parameters like the traffic lights or the speed of vehicles.
- I studied, among others, bioinformatics and probabilities algorithms, advanced communication systems and communication protocols, using programming languages such as Python and Matlab.

SOFT SKILLS

Competitive   Detail oriented   Tenacious   Proactive

Enthusiastic   Hands-on approach

PERSONAL PROJECTS

Volunteering in BEST Bucharest (10/2016 – 10/2017)
- I volunteered within the BEST Bucharest organization, participating in fundraising and sponsorship events, attending workshops on technical and design topics, as well as doing HR work during recruiting sessions.

Online courses on Udemy
- I have been participating in a series of online courses on programming languages such as React and Angular.JS. This experience helps me retain focus on the professional fields I enjoy.

Developing video games in Javascript
- Combining my passion for technology with my gaming hobby, I have developed several video games including a RPG and a simple game of cards based on math.

TECHNICAL SKILLS

PHP

MySQL
